

✓ Self-archiving of books and chapters published non-open access

Authors whose book or chapter is accepted for non-OA publication are permitted to self-archive a portion of the accepted manuscript (AM) on their own personal website, and/or in their funder or institutional repositories, for public release after an embargo period (see the table below). The AM is defined as the version of the work after the contract is signed, publication is approved, and final editorial and peer review (where applicable) is complete. The AM is not the Version of Record (VOR) and does not reflect post-acceptance and post-publication improvements on behalf of the Publisher, such as copyediting, typesetting, any amendments and corrections.

Accepted manuscript terms of use

Use of the AM is subject to an embargo period and our [AM terms of use](#), which permit users to view, print, copy, download and text and data-mine the content, for the purposes of academic research, subject always to the full conditions of use. Under no circumstances may the AM be shared or distributed under a Creative Commons, or other form of open access license, nor may it be reformatted or enhanced.

Authors should provide the following acknowledgement, and link from the accepted manuscript version to the URL of the published book or chapter on the publisher's website

"This is an Accepted Manuscript version of the following work: [author of the book], [book title], [year of publication], [publisher (as it appears on the cover of the book)]. This version of the manuscript has been accepted for publication, after final editorial and peer review (where applicable) is complete, but is not the Version of Record and does not reflect post-acceptance improvements (such as copyediting or typesetting), or any corrections. The final authenticated version is available online at: [http://dx.doi.org/\[insert DOI\]](http://dx.doi.org/[insert DOI]). Use of this Accepted Manuscript version is subject to the publisher's Accepted Manuscript terms of use: <https://www.springernature.com/gp/open-research/policies/accepted-manuscript-terms>"

The amount of the AM, or AM chapter can be deposited after first online publication; subject to Springer Nature's AM terms of use and the criteria in the table below.

<https://www.springernature.com/gp/open-science/policies/book-policies>

	Deposition terms				Location		
Accepted manuscript	Embargo length after publication*	Version of MS that can be deposited	Amount of AM that can be deposited	Creative commons/ Open licence permitted?	Institutional or funder repository***	Author's own personally maintained website	Commercial scholarly networks
Authored works	12 months	AM	Up to 10%	No	Yes	Yes	No
Edited works	12 months	AM	Author's own chapter**	No	Yes	Yes	No
Proceedings papers	12 months	AM	Author's own paper**	No	Yes	Yes (immediately on acceptance)	No

* Authors may make a closed deposit on acceptance, provided the embargo periods above are adhered to for public release.

** Each contributor to an edited work may archive up to one chapter per volume (provided they are the author or a co-author of such chapter). Please note that any linking, collection or aggregation of chapters from the same volume is strictly prohibited.

*** Excludes commercial scholarly sharing networks (e.g. ResearchGate, Academia.edu, Mendeley).

****Deposition of the amount of AM or AM chapter to author's own personally maintained website is permitted immediately on acceptance for proceedings papers.

Where authors are not able to meet their funder or institution's requirements for self-archiving by publishing via the non-OA route, they are advised to look into options for publishing open access before submitting, and indicating their requirements at the proposal/submission. Authors should check funding availability from their funders and institutions. Authors can speak to their Editors or Springer Nature's [Funding Support Service](#) for advice on meeting their funders' and institutions' OA policy requirements.

Accepted manuscript terms of use

Springer Nature Terms of Use for accepted manuscripts of subscription articles, books and chapters

The accepted manuscript (AM) is defined as the version of a manuscript accepted for publication after peer review, when applicable, but does not reflect post-acceptance improvements, or any corrections, retractions, or other post-publication editorial actions. AM versions of articles, books and chapters published within the Springer Nature group of companies which are made available according to Springer Nature's self-archiving policies for subscription articles and non-open access books/book chapters, remain subject to copyright, and, in most instances, an exclusive license to publish. Use of the AM version is solely governed by the terms agreed between Springer Nature and the respective rightsholder, the Springer Nature AM terms of use, and applicable law. By using an AM (for example, by accessing or downloading) the user agrees to abide by these Terms Of Use. Any further use is subject to written permission from Springer Nature. The terms of use are not intended to override any national law that grants further rights to any user.

The following AM terms of use apply:

Academic research only

- 1. Users may view, print, copy, download and text and data-mine the AM content, for the purposes of academic research, subject always to these Terms of Use.
- 2. Any AM content downloaded for text and data-mining purposes must be deleted or destroyed when the analysis is complete.

Use must not be for Commercial Purposes

- 3. AM content may not be used for purposes that are intended for

Open access policies

Books self-archiving policies

Journals self-archiving policies

Rights and Permissions

or directed towards commercial advantage or monetary compensation by means of sale, resale, licence, loan, transfer or any other form of commercial exploitation ("Commercial Purposes").

Wholesale re-publishing is prohibited

- 4. AM content may not be published, or otherwise made available verbatim in whole or in part, whether or not this is done for Commercial Purposes, either in print or online, except as set forth in paragraph 5 below.
- 5. This restriction does not apply to reproducing normal quotations with an appropriate citation, in accordance with fair dealing, fair use, or other unwaivable copyright exception principles under applicable law. In the case of text and data-mining, individual words, concepts and quotes up to 100 words per matching search return may be used, whereas longer paragraphs of text and images may not (without specific written permission from Springer Nature).

Reformatting and enhancement is prohibited

- 6. Under no circumstances may Springer Nature AM content be reformatted or enhanced, whether by an Author or third parties.

Onward sharing is prohibited

- 7. Provision or onward sharing of AM content to third parties without permission is prohibited, except as set forth in paragraph 5 above, and as permitted by applicable law.

Moral rights

- 8. Users must ensure that the authors' moral right to the integrity of their work is not compromised.

Attribution

- 9. All use must be fully attributed. Attribution must take the form of a citation and include a link - using the article, book, or book chapter DOI - to the published article, book, or book chapter on the publisher's journal's website.
- 10. For research integrity purposes it is best practice to cite the published Version of Record (VOR), where available (for example, see ICMJE's guidelines on overlapping publications). Where users do not have access to the VOR, any citation must clearly indicate that the reference is to an AM version.

Third party content

- 11. Where parts of AM content in the document is identified as belonging to a third party other than the rightsholder, authors, or the publisher, it is the obligation of the user to ensure that they have all rights necessary for their intended use and any use complies with copyright policies of the owner.

Use at user's own risk

- 12. Any use of Springer Nature AM content is at the user's own risk and Springer Nature accepts no liability arising from such use. It is the user's obligation to check for any updates to the content by consulting the VOR.
