Open access chapters

2. Archiving a chapter on a website or in a repository (the ‘Green’ OA model)

Our green open access policy refers to self-archiving of a chapter (not whole book) and applies to the earlier version of the chapter or ‘Accepted Manuscript’ (AM). An AM is the post-contract but pre-production (i.e. not copyedited, typeset, or proofread) Word Document/PDF version of the chapter that has been approved for publication.

Chapters from all Taylor & Francis books are eligible for green open access, as follows:

- Single authored book: one chapter
- Multi-authored book: one chapter per author
- Edited book: one chapter per editor or contributor

Authors may upload the AM chapter to a closed (not publicly accessible) departmental or institutional repository immediately after publication of the book (what is often referred to as the Version of Record), so that it is freely available for anyone within your institutional network to access. Such a repository is accessible to students or staff members only.

Authors can also post the AM book chapter to an open repository or academic social media site (such as Mendeley, ResearchGate or Academia.edu), or a personal or departmental website (including Facebook, Google groups, LinkedIn and Twitter), after an embargo period of 18 months for Humanities and Social Sciences books or 12 months for STEM books. All authors are required to respect the relevant embargo periods before making AMs available as an open deposit. An open repository is one that is freely available for anyone to access. In some cases, exceptions can be made to our embargo periods to meet funder mandates.

We recommend that you apply a Creative Commons (CC) license to the AM version to make it clear to others how they can reuse your work. We recommend the Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) license. In summary, this Creative Commons License permits the sharing of the OA Content by others provided that the Author is credited but does not permit any alterations to the OA Content or for it to be built upon or for the OA Content to be used commercially. The following statement can be used when sharing your AM chapter:

“It is deposited under the terms of the Creative Commons Attribution-NonCommercial-NoDerivatives License (<http://creativecommons.org/licenses/by-nc-nd/4.0/>), which permits non-commercial re-use, distribution, and reproduction in any medium, provided the original work is properly cited, and is not altered, transformed, or built upon in any way.”

Authors may not post the final published book chapter (Version of Record) to any site, unless it has been published as gold open access on our website. Please note that the author is responsible for supplying their AM version of their chapter for self-archiving.

	Closed departmental or institutional repository (e.g. restricted access university or funder intranet)	Open repository, website or social media site (e.g. OA university repository, Mendeley, ResearchGate, Academia.edu or personal websites)
Pre-Production Chapter (AM)	After publication of the book (Version of Record)	After an embargo period of 18 months for HSS and 12 months for STEM books
Published chapter (Version of Record)	Only Gold OA chapters can be uploaded immediately after publication of the book	Only Gold OA chapters can be uploaded immediately after publication of the book

To encourage citation of an author’s work we request that authors insert a link from their posted AM to the published book on the Taylor & Francis website with the following text:

“This is an Accepted Manuscript of a book chapter published by Routledge/CRC Press in [BOOK TITLE] on [date of publication], available online: [http://www.routledge.com/\[BOOK ISBN URL\]](http://www.routledge.com/[BOOK ISBN URL]) or [http://www.crcpress.com/\[BOOK ISBN URL\]](http://www.crcpress.com/[BOOK ISBN URL])”

Please note that our Green OA policy applies to titles published under Taylor & Francis imprints only and does not cover co-publications or third-party distribution titles. In these instances, please reach out to the original publisher for information on their Green OA policy.

For any further guidance or support around Green Open Access please feel free to reach out to our [OA Books team](#)
