Reuse of your work

We have tried to create a good balance between giving authors flexibility and control over how they use their research and our need as a publisher to sell our books to recoup our investment.

Green Open Access and self-archiving policy for books and chapters

For our journals policy please visit our [Open Access Journals webpage](#)

Authors may be required by research funders or their institution to make a book or chapter freely available, or to archive a copy in a repository. We offer both Gold Open Access options and Green Open Access options to enable you to comply with these policies and make your work more accessible.

Gold Open Access is a paid for option for making the final published version (the version of record, or VoR) available Open Access immediately on publication. This is the most effective way of widening dissemination and is available for both chapters and the full book. Click [here](#) for details of our Gold OA options.

Green Open Access is an alternative option for making the pre-production 'Author's Accepted Manuscript' (AAM) available Open Access without a charge. This is available for a limited number of individual chapters (not full books) as detailed in our policy below.

Green Open Access policy

The policy applies to material included in:

scholarly monographs, and edited scholarly works
Research Handbooks

- Reference works such as encyclopaedias, dictionaries or legal commentaries.

Summary of our Green Open Access policy

	Closed repository	Open repository
Definition	A repository that can only be accessed by members of a single institution or funder with log in	A repository that can be accessed externally on the internet, including open university repositories, personal website and social sharing sites
Single authored book	The AAM of one chapter may be posted by the author without embargo	The AAM of one chapter may be posted 12 months after publication
Multi authored book	The AAM of one chapter may be posted by the authors without embargo	The AAM of one chapter may be posted by the authors 12 months after publication
Edited book	The AAM of one chapter may be posted by each contributor without embargo	The AAM of one chapter may be posted by each contributor after 12 months

The AAM is the author accepted manuscript. This is the version that has been submitted to the publisher and accepted for publication, but has not yet been edited, typeset and paginated by the publisher.

repository)

- In some cases, exceptions can be made to our embargo periods to meet funder mandates.
- Authors may post a single chapter from their authored book
- Contributors to an edited book may post a single chapter that they have contributed
- The original submitted version (the AAM) is posted (i.e. before any editing by or on behalf of Edward Elgar Publishing.)
- Full acknowledgement is made to the published work, including authors, editors and publisher.
- The content is only for non-commercial use and must not be used for training AI systems (such as LLMs).

Please apply a Creative Commons (CC) license to the AM version to make it clear to others how they can reuse your work.

We recommend the Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) license. This Creative Commons Licence allows sharing of the OA chapter by others ensuring that the Author is credited but does not permit any alterations to the OA Content or it to be used commercially without permission.

This permission does not cover any part of the material that is attributed to another source from which you would have to obtain separate permission.

Please add the following text to the manuscript before posting.

This is a draft chapter/article. The final version is available in [insert book title] edited by [insert editor(s) or author(s)], published in 20xx, Edward Elgar Publishing Ltd
<http://dx.doi.org/10.4337/978XXXXXXXXXX.000XX>

It is deposited under the terms of the Creative Commons Attribution-NonCommercial-NoDerivatives License (<http://creativecommons.org/licenses/by-nc-nd/4.0/>), which permits non-commercial re-use, distribution, and reproduction in any medium, provided the original work is properly cited, and is not altered, transformed, or built upon in any way.

Without limiting the author's and publisher's exclusive rights, any unauthorised use of this work to train generative artificial intelligence (AI) technologies is expressly prohibited.
