Open access for book authors

Green open access

Monograph policy

All authored research monographs can take part in our green open access policy.

After the embargo period, you may place the author accepted manuscript (the version of the manuscript after peer/series review but before copyediting) on your institutional repository. In addition you may place one chapter from the original manuscript (not the published version) of your monograph on any non-commercial, non-profit subject repository. You are responsible for retaining the PDF of the proof copy and for providing the PDF to your institution.

The embargo period is 36 months from the publication of the hardback edition.

This policy does not apply to textbooks, handbooks, edited collections, critical editions or reference works.

If your book comes under the **UKRI Open Access Policy**, please contact your commissioning editor to discuss. We will comply with the policy through Gold or Green routes.

The embargo period is 36 months from the publication of the hardback edition of the book containing your chapter.

This policy does not apply to monographs, textbooks or critical editions.

If your book comes under the **UKRI Open Access Policy**, please contact your commissioning editor to discuss. We will comply with the policy through Gold or Green routes.

Chapter gold open access

Individual chapters in an edited collection can be made open access. The chapter processing charge is £1,500 (+VAT if applicable). Only that chapter will be made available open access, not the entire collection.

The price of the ebook edition of the volume will be reduced to reflect the element of the book that is open access.

Using third-party material in an open access publication

You may use third-party material as long as you have cleared permission to do so. You will need to mark this content clearly and state the terms under which it has been made available. This is to prevent anyone from reusing it without seeking the permission of the original copyright holder. If you are unable to clear permission to use the material within an open access format, you may not legally use it.
