

Sharing your Work / Self-Archiving

2026: [Sharing your Work / Self-Archiving](#)

Brill's policies are designed to facilitate compliance with institutional and funder requirements on accessibility of their research, while also maintaining the sustainability of the journals and book series that we publish together with, and on behalf of, the academic community.

Brill allows authors to share their work in non-commercial online repositories and archives **without an embargo** under the following conditions.

Open Access

Please note these do not apply for **any publications published in Open Access on brill.com** with a **Creative Commons license**.

Plan S and the Rights Retention Strategy

Are you an author or editor who is expected to comply with **Plan S and the rights-retention strategy**? Brill facilitates compliance via Transformative Agreements and otherwise. Please reach out to openaccess@brill.com for more information.

Articles & Contributions to Edited Volumes

Version	Stage	Share	Where
First draft	Pre-peer review	At any point in the publication process	• Institutional repository • Not-for-profit subject repository • Funder repository • Personal or company website • Scholarly Collaboration Network that adheres to STM sharing principles; see below. <i>Brill does not allow sharing to Academia.edu or ResearchGate.</i>
Author Manuscript	Post-peer review	Immediately after publication: 0 months	• Institutional repository • Not-for-profit subject repository • Funder repository • Personal or company website

Version	Stage	Share	Where
			Scholarly Collaboration Network that adheres to STM sharing principles; see below. <i>Brill does not allow sharing to Academia.edu or ResearchGate.</i>
Published PDF	Post-publication	Personal use only	Personal sharing allowed between up to 8 colleagues or peers

Scholarly Collaboration Networks

- ArXIV
- BioRxiv
- Center for Open Science
- EndNote
- Figshare
- Institutional Repository
- LabArchives
- LOOP
- Mendeley
- Paperhive
- Papers
- PubMed Central
- ReadCube
- RefWorks
- REPEC
- SSRN
- Trellis

Monographs (based on PhD theses or dissertations)

- Authors or their institutions may post the accepted **manuscript version** 12 months after publication in a **closed** repository (intranet). Such a repository is accessible to students and staff only.
- It is possible to publish a monograph in Open Access in exchange for a publication charge, even after publication. This would make it available online for everyone to access and download, as well as make possible unlimited sharing of the final published PDF. For more information, please contact openaccess@brill.com.

We trust that through this policy we allow maximum freedom of use of our publications without endangering their viability. For further information on permitted uses and permissions visit the [Rights and Permissions pages](#). For our Open Access options, please visit our [Open Access at Brill page](#).
